## TRAFFIC ADVISORY

Plans to close a section of Washington Street Thursday for road work have been postponed until Friday, town officials said this week.

The forecast is clear, according to the National Weather Service, but work will be rescheduled for Saturday if there is inclement weather.

Washington Street, or Rte. 16, will be closed from Curve Street to Locust Street from 7 a.m. until 6 p.m. The closure will allow a final coat of pavement to be laid down as the last step in this section of a major road improvement project funded by a \$700,000 state grant.

Detour arrangements are as follows:

Eastbound traffic on Washington Street will be detoured onto Central Street to Railroad Street to Woodland Street to Lowland Street to Jeffrey Avenue to Rogers Road to Whitney Street.

Westbound traffic on Washington Street will be detoured onto Whitney Street to Rogers Road to Jeffrey Avenue to Lowland Street to Woodland Street to Railroad Street to Central Street.

There will not be any access to Washington Street from High Street. High Street traffic will be detoured onto Locust Street. Residents on High, Copper, Silver, Jennings and Windsor Streets should proceed to Concord Street or Locust Street.

There will not be any access to Washington Street from Baker Street. Residents should proceed to Concord Street.

There will not be any access to Washington Street from Woodland Street. Residents on Norland, Regal and the affected area of Woodland Street should proceed to Lowland Street or to Railroad and Central Streets.
